RFQ for the request for quotations from agencies for solid waste sample collection and waste characterization in Mumbai

Reply to Pre-Bid Queries

S. No.	RFP Clause	Description as per RFP	Pre-bid queries	Replies/Remarks
1	Section-5 point f	The sampled waste shall be segregated into nine waste categories (Plastic, Paper, Glass, Metals, Rubber, Cloths, Food waste/ Organic, Horticulture waste and wood, Soil/Silt/ Ash/ Inerts).	If we have to segregate plastics or paper, should it be further segregated into?	Yes, there will be further segregation of plastics into different types of plastics like HDPE, LDP etc. Example: There will be broader segregation of waste categories at the sampling area. Once the segregated waste is segregated bin wise, Further segregation of plastics like HDPE, LDP, PP, PS etc. will be done on total segregated plastics (combined of all samples)
2	General Query		If you give one more day to submit the quotation.	Date is extended to 2nd May 2024, please visit https://niua.in/tenders for more information.
3	Form TECH–2: Power of Attorney		Kindly want to know how to submit a power of attorney? It will be on the stamp paper or simple green paper.	Power of attorney to be submitted on Rs 20 Stamp Paper.
4	Section-5 point b and f	b. The agency will need to conduct door-to-door waste collection on a sample basis to ensure comprehensive data gathering. This process will involve collecting and weighing samples from major 10-12 waste generator categories, including residential (slum, low, middle, and high income), commercial (office and market), institutional, small/medium manufacturing, hotels, vegetable markets, and predominant places of worship. Approximately 10 samples will be collected from each category, totaling around 120 samples. f. The sampled waste shall be segregated into nine waste categories (Plastic, Paper, Glass, Metals, Rubber, Cloths, Food waste/ Organic, Horticulture waste and wood, Soil/Silt/ Ash/ Inerts).	Kindly share sampling categories in details.	The sampling categories are tentatively of 9 categories (Plastic, Paper, Glass, Metals, Rubber, Cloths, Food waste/ Organic, Horticulture waste and wood, Soil/Silt/ Ash/ Inerts). The categories might vary as depending on the finalization of the strategy. This process will involve collecting and weighing samples from major 10-12 waste generator categories, including residential (slum, low, middle, and high income), commercial (office and market), institutional, small/medium manufacturing, hotels, vegetable markets, and predominant places of worship.
